SYNTHETIC TURF

## Verti-Top 1200

Regular maintenance of synthetic turf is necessary to keep playing surfaces clean, bacteria-free and allow water infiltration. The Verti-Top 1200 employs a highly effective synthetic rotary brush to remove debris and top layer infill from the turf, then sifts the debris out in a unique vibratory shaker which redistributes the clean infill back on the field. Finishing the work is a rear lag brush, leaving a clean and smooth playing surface. Now with Vacuum Attachment.

| FEATURE                   | BENEFIT   |
|---------------------------|---|
| Smaller working width     | Will fit in gates and ideal for indoor use                |
| Softer long lasting brush | No damage to field  |
| Front Casters             | Does not roll or skip lighter turf                        |
| Vacuum Attachment         | Collects finer material such as dust, hair and pollutants |
